CONSULTING

ERGO TECHNIQUE is a modern and powerful technical company that operates in a wide range of projects such as Industrial Buildings & Logistic Warehouses, MEP Facilities, Hotels, Commercial Offices, Industrial Facilities, Special Projects.

ERGO TECHNIQUE provides services for the design, project management and construction of technical works. With the most modern technological tools we adapt the project to the needs of the customer. In collaboration with the engineers and technicians who frame our human resources, we are able to handle all kinds of simple or specialized requirements with absolute know-how and methodology offering high quality services.

ERGO TECHNIQUE provides high quality results in both Greece and Cyprus as well as in countries in Europe and the Middle East.

ERGO TECHNIQUE has the method and experience for **DESIGN, MANAGE** and **CONSTRUCT PROJECTS** such as:

BUILDING PROJECTS

MEP & INDUSTRIAL PROJECTS

HOTEL PROJECT

SPECIAL WORKS

INDUSTRIAL REFRIGERATION SYSTEMS

RENEWABLE ENERGY SYSTEMS

INDUSTRIAL FLOORS

**ESFR (Early Suppression Fast Response)
Fire Sprinkler Systems**

ERGO TECHNIQUE has the necessary technical background to implement each requirement.

1. Requirement Analysis & Diagnostic Reports (RA & DR)
2. Detailed Design (DD)
3. Project Management (PM)
4. Construction & Construction Management (CO & CM)
5. Commissioning & Facility Maintenance (Cx & FM)

A. REQUIREMENT ANALYSIS

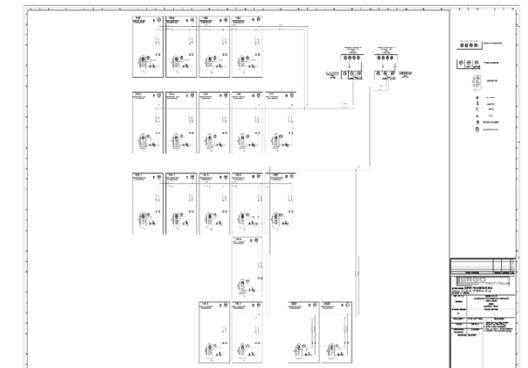

B. DETAILED DESIGN

C. PROJECT CONSTRUCTION

1. Requirement Analysis & Diagnostic Report
2. Conceptual Design
3. Master Plan
4. Activities & Equipment

01. REQUIREMENT ANALYSIS

We believe that understanding customer requirements is the key pillar to ensure the integrity and completeness of a project

For this reason each project starts with the **Analysis of Requirements & Diagnostic Study** (Storage Needs, Productive Needs building needs, etc.) until the formation of the final Building Concept.

With this approach we are able to adapt and anticipate every possible need of the project at both technical and economic and operational level.

02. BUILDING CONCEPT

The building under design shall adapt to the **current stock & production needs and not vice versa**. Such requirements relate to the following:

- Maximum Storage volume of building
- Optimum flow of goods in the production process
- Flexibility of racking arrangement with variable aisle positions
- Size flexibility of all functional areas (RL, Cross Docking Area, Added Value Area)

03. MASTER PLAN

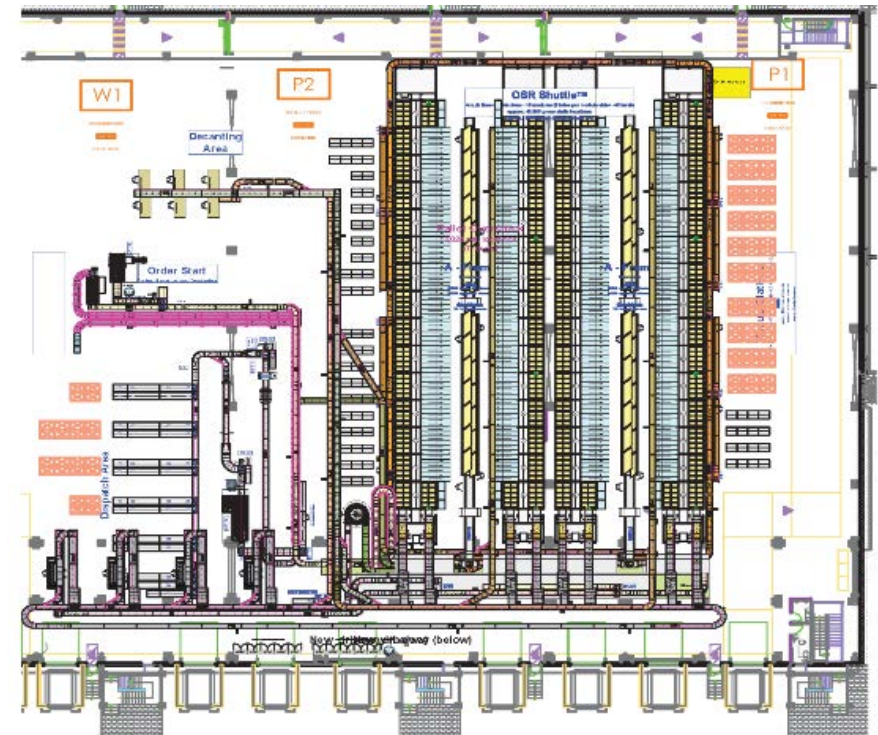

Design includes **full utilization of available terrain** and construction of the project in phases, in order for a possible future plant expansion to be optimum from a financial, technical and operational point of view.

04. ACTIVITIES & EQUIPMENT

Presentation and **selection** among the most up to date **methods and equipment in Logistics Center operation:**

- Racks
- Material Handling Equipment
- Automations Systems and
- Warehouse Management Systems & Activities

Diagnostic Study and Requirement Analysis aim to **collect, organize, illustrate and present** all project requirements regarding the **Building Structure**, the **Electro-Mechanical Facilities**, the **Production Procedures**, the **Financial Restraints** and the **phases of Design & Construction**.

This section defines the contents of each stage of a project.

1. Data Collection & Organization of Project Design Standards
2. Diagnostic Study & Market Research for Special Equipment Installations
3. Building Concept Analysis, Development & Presentation
4. Building Composition (Drawings, Technical Specifications, Business Plan Budget)
5. Installation Approvals
6. Business Technical Documentation

This section is the final design step of the project and concerns:

- **Detailed Design for Architectural** (Architectural, Exterior Improvements, Passive Fire, Offices, Energy Efficiency Certification)
- **Detailed Design for Structural** (Metals, Concrete, Floors Εκσκαφές, Earthworks & Foundations, Structural, Slab on Grades)
- **Detailed Design for Civil** (Earthworks, Demolition)
- **Detailed Design for Special Equipments** (Signage, Offices Equipment, Production Equipment, Storage Equipment, Railway Equipment)
- **Detailed Design for Industrial Refrigeration**
- **Detailed Design for Mechanical Services & Networks Design** (HVAC, Fire Suppression, Water Suplly, Sewage Disposal, Ventilation, Pressured Air, Elevation Systems, GAS Systems)
- **Detailed Design for Electrical Services Design** (Lightning, Panelboards, Utility Grid Connection, Main Distribution Installation, Earthing & Lightining Protection, Communications)
- **Detailed Design for Special Systems**
- **Detailed Design for Renewable & Sustainable Energy Design**

Continuous Improvement & Innovations

DA10-23 © MATERIAL DATA SHEETS & BROCHURES

- ✓ Concept Design & **Project Strategies** in detailed form, character and function
- ✓ Finalization of all equipment and system **sizing**, as well as of all component materials
- ✓ Completion of all intermediate architectural and engineering **ERGO TECHNIQUE design work** (incl. calculations, specifications, drawings, quantity takeoffs and descriptive information in sufficient detail) in compliance with the design brief, International Standards & Regulations and best practice
- ✓ All other activities receive input from and incorporate solutions for management, **operation, maintenance**, staffing, servicing, etc. ensuring that Client requirements are met
- ✓ Derivation of **Cost** Information

Development of design work as follows:

- Consultation from **Third Parties** (vendors, specialists, etc.), where required
- **Coordination** between different disciplines based on Project Organization Chart
- **Project Design Criteria development** from Concept Design stage based on Design Brief as guidance for all disciplines
- **Deliverables specified** in terms of type, nomenclature, content, detail level etc.
- **Change Control Procedures** implemented to ensure that any changes to the Concept Design are properly considered and signed off

1. Final Studies
2. Permitting Phase
3. Detailed Design
4. Project Item List
5. Tendering Files

This section consists of the client's technical support with regard to the project's Execution Strategy, Technical Management & Construction Supervision and Project Management.

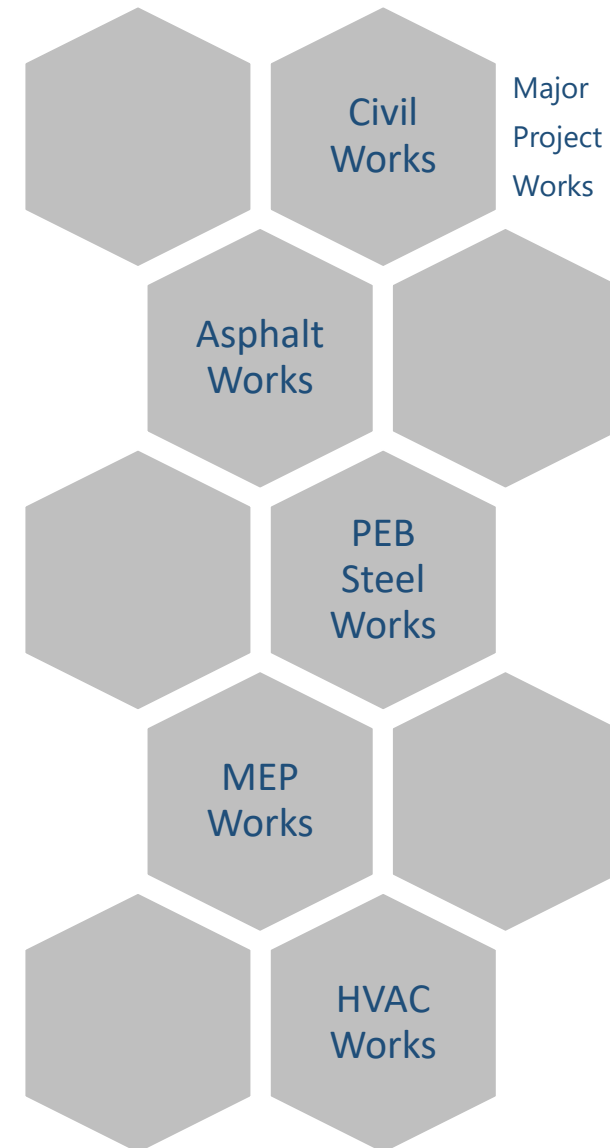

- **Project Tendering Process** (Offers Evaluation, Contractors Negotiation, Technical Contracts)
- **Technical Management & Project Supervision** (Construction Engineer Reports, Project Calendar Data Base, Project Photo Gallery, As Built Drawing, Safety Control)
- **Project Management** (General Administration, Communications & Issues Protocol, Project Management Schedule, Quality Control Project, Budget Management, Finance Program Management)
- **Commissioning Management & Facility Maintenance Management** (General System Startup, Testing & Commissioning, Start Up, Staff Selection & Training)

BASIC PRINCIPLES

Construction to be carried out by 4 – 8 qualified Sub-contractors for the following **major works of the Project**, such as:

Aiming to:

- ✓ **Assign all Item List items** to the scope of work of related Sub-contractors
- ✓ **Coordinate** all different works
- ✓ Specify all **details** between different works, so as to guarantee the Project **quality**

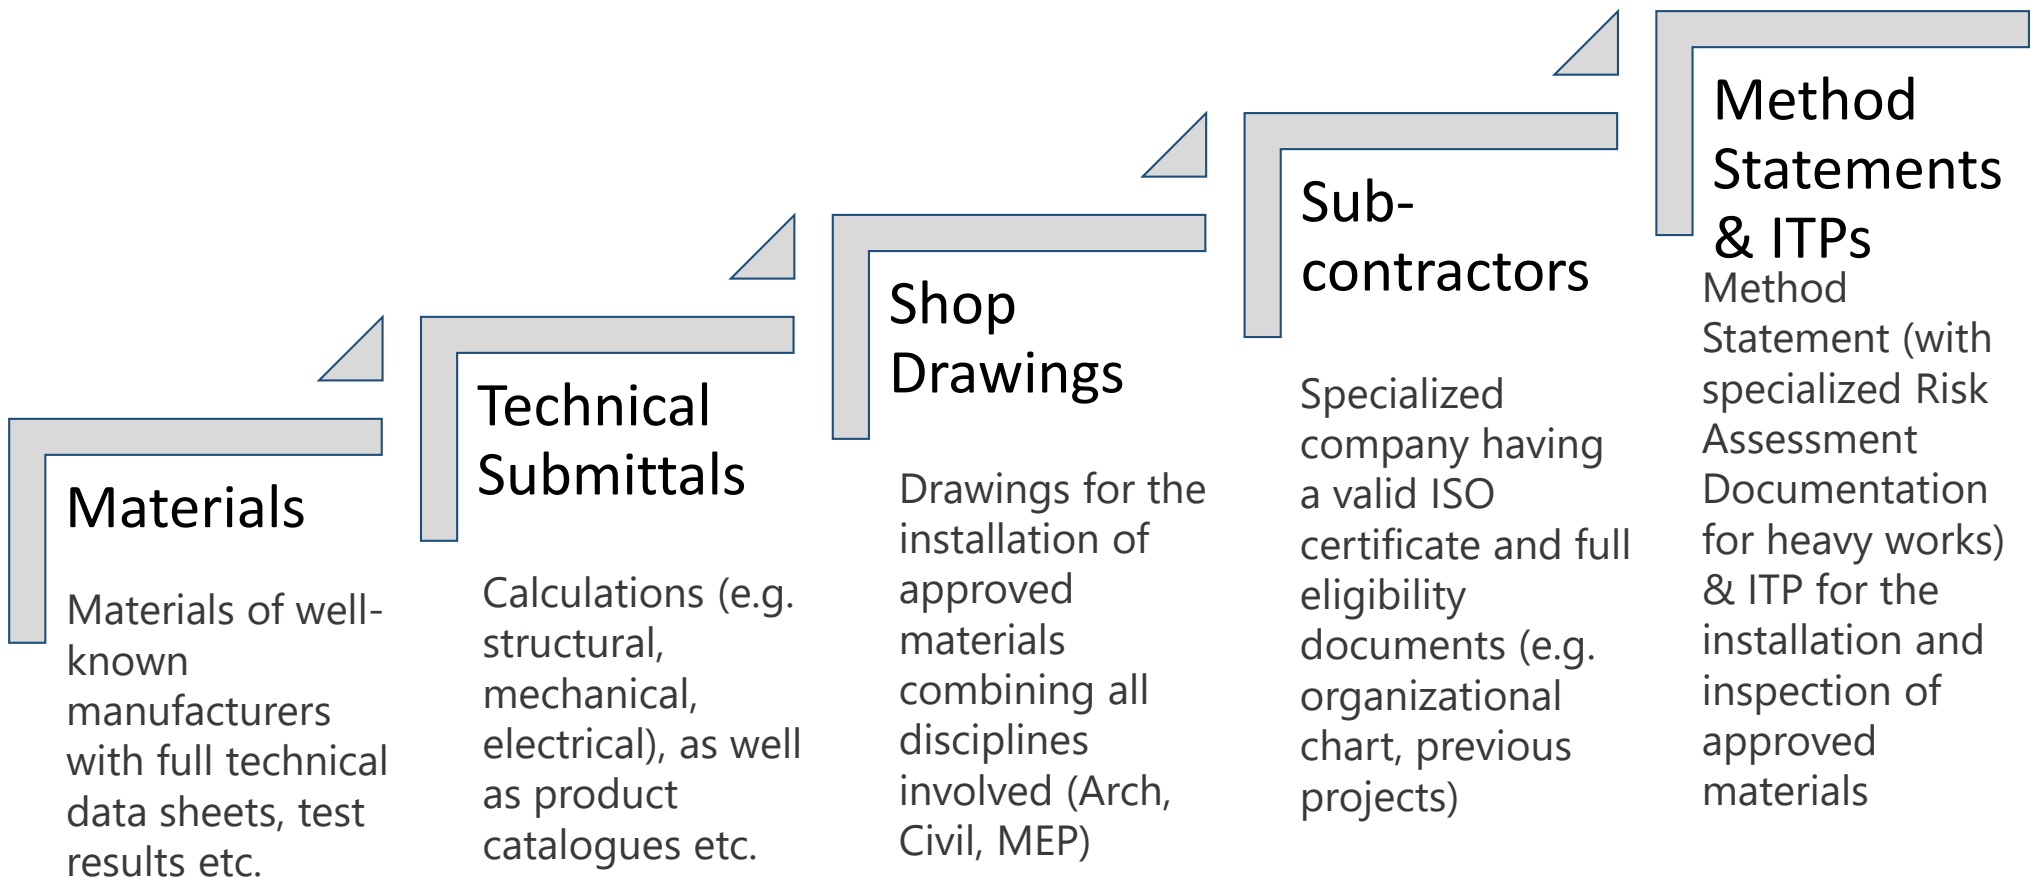

Construction Management

In terms of Construction Management,
ERGO TECHNIQUE shall perform:

- Technical Management
- QA/QC Management
- Time Schedule Management
- Valuations Management

TECHNICAL MANAGEMENT (Review of Required Documentation)

Project & Construction Management following the Detailed Design Process and offering services that guarantee:

1. Time Schedule Adherence
2. Administration Quality Control
3. Budget Management
4. Site Administration
5. Technical Management

This section consists the construction phase of the project. **ERGO TECHNIQUE** is proud to provide installation services such as:

- **Architectural Facilities Installation**
- **Structural Facilities Installation**
- **MEP Facilities Installation**
- **Special Flooring Installation**
- **Tendering Process**
- **Project Management**
- **Construction Management**
- **Commissioning Management**
- **General System Startup, Testing & Commissioning, Start Up, Staff Selection & Training**

ERGO TECHNIQUE after years of involvement in the technical field has gained considerable experience in **CONSTRUCTION** and **MAINTENANCE** such as:

- **Industrial Refrigeration Systems**
- **Industrial Floors, Super Flat Floors**
- **Epoxy Floors**
- **ESFR (Early Suppression Fast Response) Fire Sprinkler Systems**
- **Special Storage Systems (Racks, Mezzanines etc)**
- **MEP Systems (Plumbing, Medium Voltage Electrical Facilities etc)**
- **Commercial Offices Specialities**
- **Special Equipment**
- **Facilities Maintenance**

The commissioning process formalizes review and integration of all project expectations during **planning, design, construction, and occupancy phases** through inspection, functional performance, testing and supervision of operator training and record documentation.

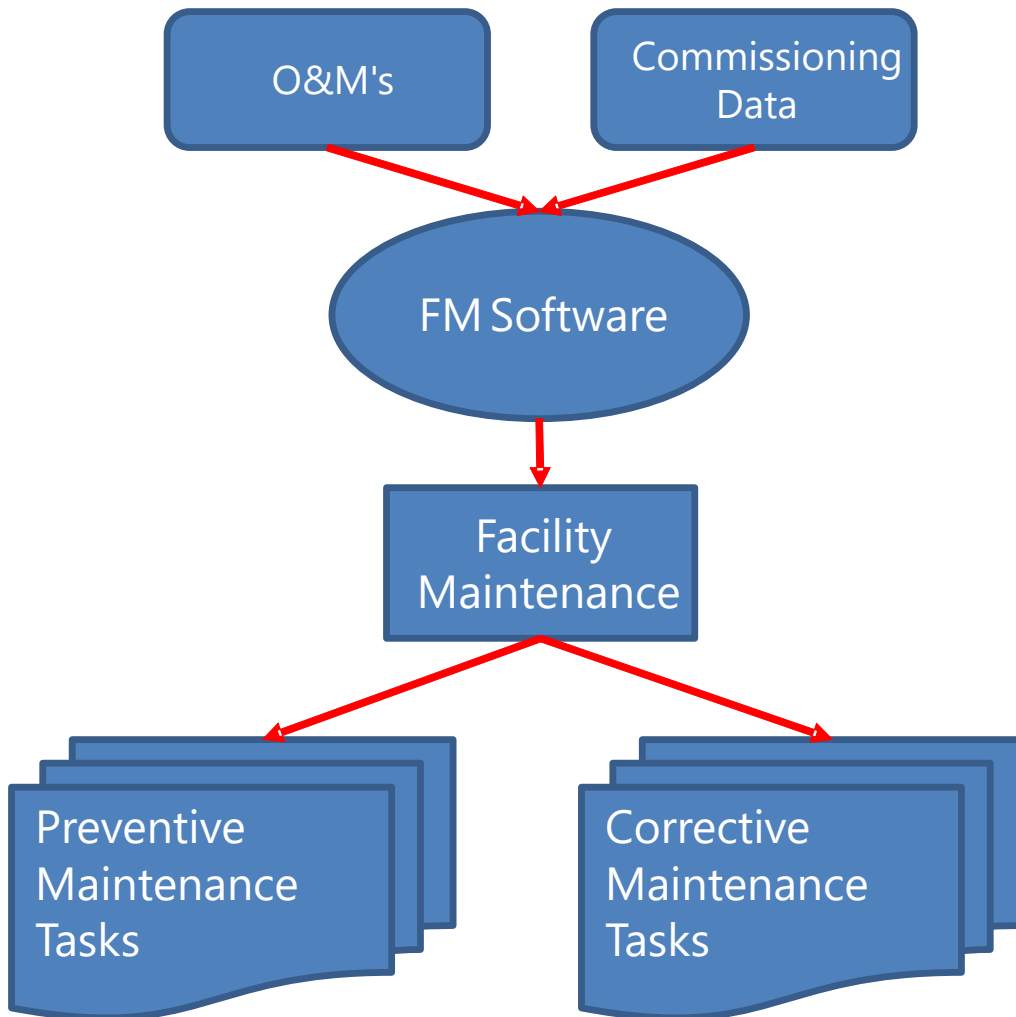

- Ensures adherence to Health & Safety principles within the facility
- Optimizes energy use. Specifically the HVAC systems are adjusted to operate at optimum level reducing energy waste
- Reduces Operating and Maintenance costs
- Ensures adequate O&M staff orientation and training
- Improves installed building systems documentation
- Provides smooth integration of MEP services and delivers the project according to the Owner's requirements.

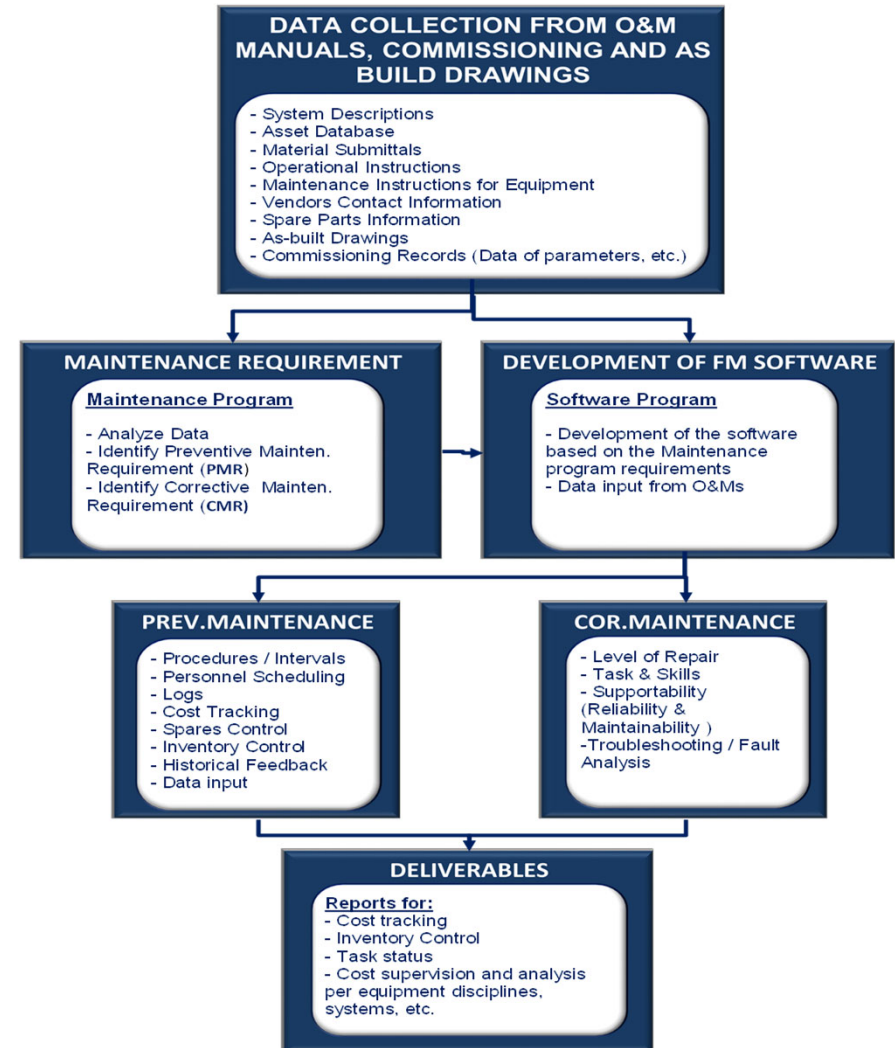

Our experience in Commissioning Services allows us to provide teams of high specialization that can be integrated into existing organizations. **ERGO TECHNIQUE** has alliance partners providing LEED certification, and TAB services in accordance with National & Local standards.

The facility maintenance secures the best level operation of the facilities.

ERGO TECHNIQUE has developed its own software information management system in order to be worthy of expectations:

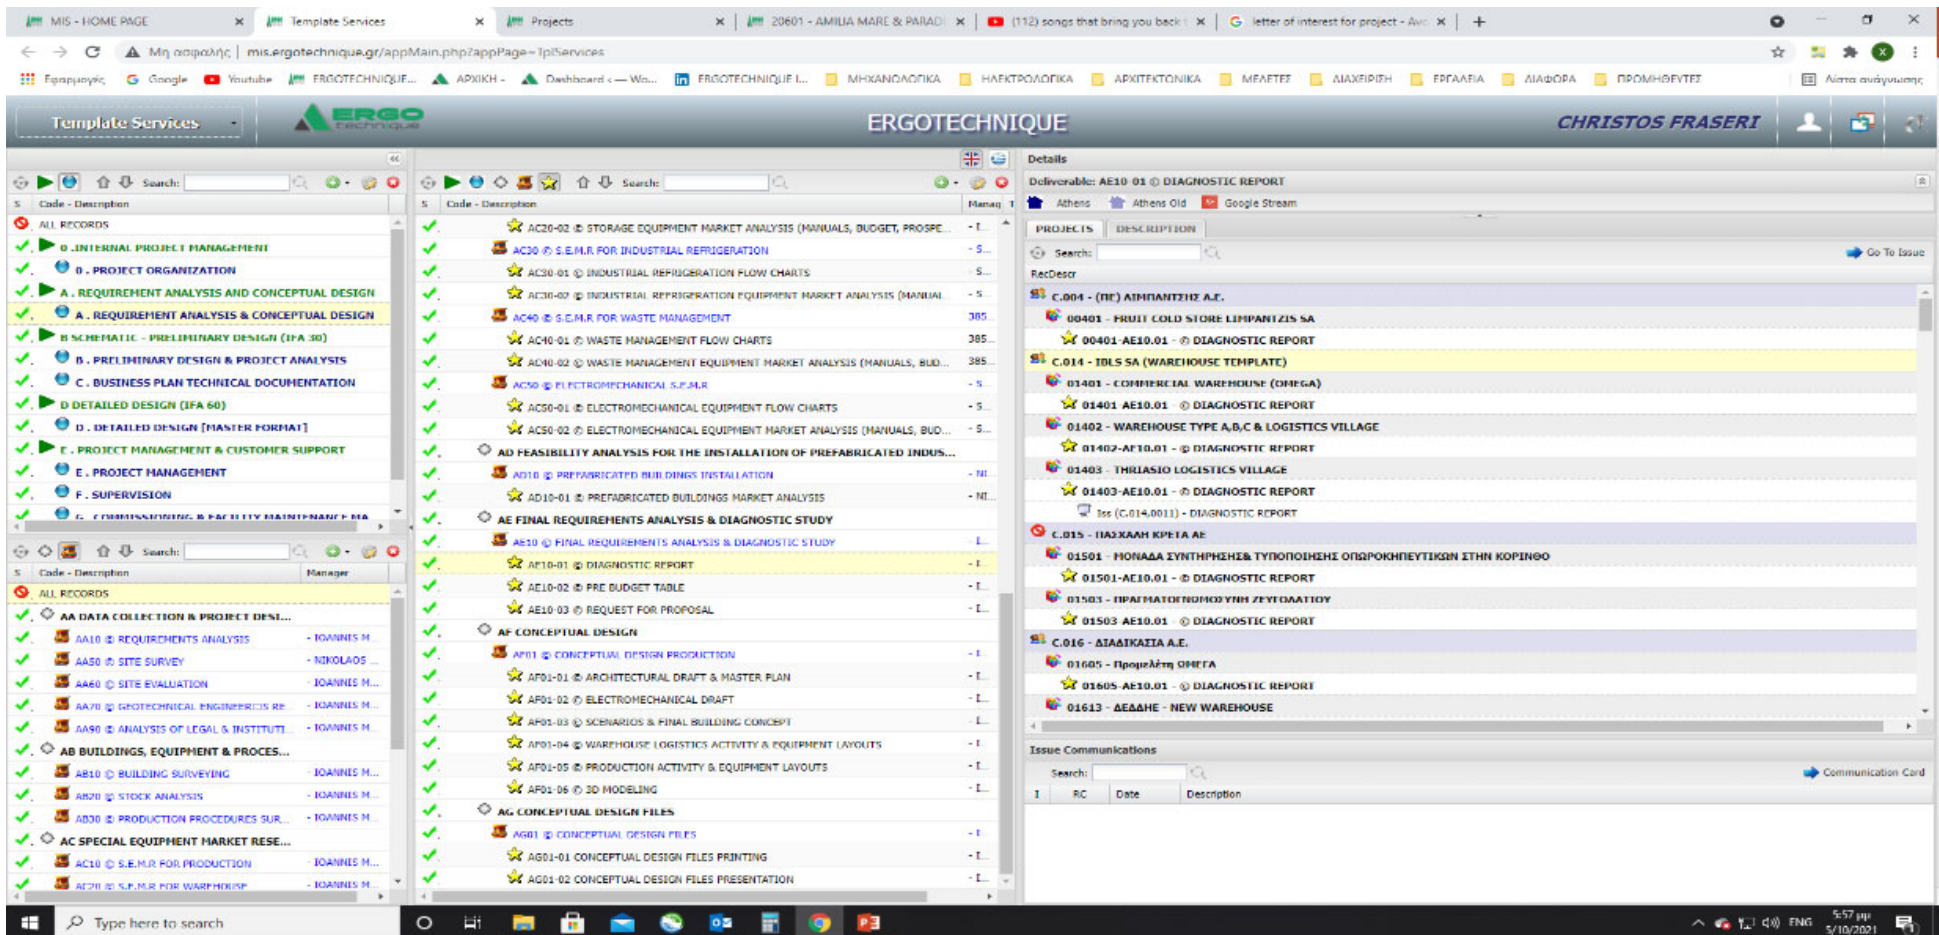

The screenshot displays the ERGOTECHNIQUE software interface, which is a project management system. The interface is divided into several sections:

- Header:** Includes the ERGOTECHNIQUE logo, the name of the user (CHRISTOS FRASERI), and navigation icons.
- Left Panel:** A tree view showing project structure with categories like "INTERNAL PROJECT MANAGEMENT", "PROJECT ORGANIZATION", and "REQUIREMENT ANALYSIS AND CONCEPTUAL DESIGN".
- Central Panel:** A list of project records with columns for "Code - Description" and "Manager". It shows various project phases and deliverables, such as "AC20-02 STORAGE EQUIPMENT MARKET ANALYSIS" and "AE10-01 FINAL REQUIREMENTS ANALYSIS & DIAGNOSTIC STUDY".
- Right Panel:** A "Details" view for a specific deliverable (AE10-01 DIAGNOSTIC REPORT). It shows a list of projects and descriptions, including "C.004 - (ΠΕ) ΑΙΜΠΑΝΤΖΗΣ Α.Ε." and "C.014 - IBL SA (WAREHOUSE TEMPLATE)".
- Bottom Panel:** An "Issue Communications" section with a table for tracking issues. The table has columns for "I", "RC", "Date", and "Description".

TECHNICAL MANAGEMENT (In house developed tools)

In house developed Cloud Application ensures:

- Documentation QA/QC
- Real time collaboration & online availability at any time with **0 error**
- Document transmittal generator

The screenshot displays the ERGOTECHNIQUE web application interface. The top navigation bar includes 'Template Services', 'Projects', and 'CHRISTOS FRASERI'. The main content area is divided into three panels:

- Left Panel:** A hierarchical tree view of project management stages, including 'INTERNAL PROJECT MANAGEMENT', 'PROJECT ORGANIZATION', 'REQUIREMENT ANALYSIS AND CONCEPTUAL DESIGN', 'SCHEMATIC - PRELIMINARY DESIGN (IFA 30)', 'PRELIMINARY DESIGN & PROJECT ANALYSIS', 'BUSINESS PLAN TECHNICAL DOCUMENTATION', 'DETAILED DESIGN (IFA 60)', 'DETAILED DESIGN [MASTER FORMAT]', 'PROJECT MANAGEMENT & CUSTOMER SUPPORT', 'PROJECT MANAGEMENT', 'SUPERVISION', and 'COMBINATION OF IFA 30 & IFA 60 MAIN PLAN'. Below this is a section for 'AA DATA COLLECTION & PROJECT DESIGN' with tasks like 'AA10 REQUIREMENTS ANALYSIS', 'AA50 SITE SURVEY', 'AA60 SITE EVALUATION', 'AA70 GEOTECHNICAL ENGINEERING RE...', and 'AA80 ANALYSIS OF LEGAL & INSTITUTIONAL'. Further down are sections for 'AB BUILDINGS, EQUIPMENT & PROCESSING', 'AC SPECIAL EQUIPMENT MARKET RESEARCH', and 'AD FEASIBILITY ANALYSIS FOR THE INSTALLATION OF PREFABRICATED INDUSTRIAL BUILDINGS'.
- Middle Panel:** A list of tasks with columns for 'Code - Description' and 'Manager'. Tasks include 'AC20-02 STORAGE EQUIPMENT MARKET ANALYSIS (MANUALS, BUDGET, PROSP...', 'AC30 S.E.M.R. FOR INDUSTRIAL REFRIGERATION', 'AC30-01 INDUSTRIAL REFRIGERATION FLOW CHARTS', 'AC30-02 INDUSTRIAL REFRIGERATION EQUIPMENT MARKET ANALYSIS (MANUAL...', 'AC40 S.E.M.R. FOR WASTE MANAGEMENT', 'AC40-01 WASTE MANAGEMENT FLOW CHARTS', 'AC40-02 WASTE MANAGEMENT EQUIPMENT MARKET ANALYSIS (MANUALS, BUD...', 'AC50 ELECTROMECHANICAL S.E.M.R.', 'AC50-01 ELECTROMECHANICAL EQUIPMENT FLOW CHARTS', 'AC50-02 ELECTROMECHANICAL EQUIPMENT MARKET ANALYSIS (MANUALS, BUD...', 'AD FEASIBILITY ANALYSIS FOR THE INSTALLATION OF PREFABRICATED INDUS...', 'AD10 PREFABRICATED BUILDINGS INSTALLATION', 'AD10-01 PREFABRICATED BUILDINGS MARKET ANALYSIS', 'AE FINAL REQUIREMENTS ANALYSIS & DIAGNOSTIC STUDY', 'AE10 FINAL REQUIREMENTS ANALYSIS & DIAGNOSTIC STUDY', 'AE10-01 DIAGNOSTIC REPORT', 'AE10-02 PRE BUDGET TABLE', 'AE10-03 REQUEST FOR PROPOSAL', 'AF CONCEPTUAL DESIGN', 'AF10 CONCEPTUAL DESIGN PRODUCTION', 'AF10-01 ARCHITECTURAL DRAFT & MASTER PLAN', 'AF10-02 ELECTROMECHANICAL DRAFT', 'AF10-03 SCENARIOS & FINAL BUILDING CONCEPT', 'AF10-04 WAREHOUSE LOGISTICS ACTIVITY & EQUIPMENT LAYOUTS', 'AF10-05 PRODUCTION ACTIVITY & EQUIPMENT LAYOUTS', 'AF10-06 3D MODELING', 'AG CONCEPTUAL DESIGN FILES', 'AG10 CONCEPTUAL DESIGN FILES', 'AG10-01 CONCEPTUAL DESIGN FILES PRINTING', and 'AG10-02 CONCEPTUAL DESIGN FILES PRESENTATION'.
- Right Panel:** A 'Details' view for a 'DIAGNOSTIC REPORT' (AE10-01). It shows a list of projects with columns for 'PROJECTS' and 'DESCRIPTION'. Projects include 'C.004 - (ΠΕ) ΑΙΜΠΑΝΤΖΗΣ Α.Ε.', '00401 - FRUIT COLD STORE LIMPAZIS SA', 'C.014 - TBL5 5A (WAREHOUSE TEMPLATE)', '01401 - COMMERCIAL WAREHOUSE (OMEGA)', '01401 AE10.01 - DIAGNOSTIC REPORT', '01402 - WAREHOUSE TYPE A,B,C & LOGISTICS VILLAGE', '01402-AF10.01 - DIAGNOSTIC REPORT', '01403 - THRIASIO LOGISTICS VILLAGE', '01403-AE10.01 - DIAGNOSTIC REPORT', 'C.015 - ΠΑΧΧΑΛΗ ΚΡΕΤΑ ΑΕ', '01501 - ΠΡΟΜΑΔΑ ΣΥΝΤΗΡΗΣΗΣ & ΤΥΠΟΠΟΙΗΣΗΣ ΟΠΩΡΟΚΗΠΕΥΤΙΚΩΝ ΣΤΗΝ ΚΟΡΙΝΘΟ', '01501-AE10.01 - DIAGNOSTIC REPORT', '01503 - ΠΡΑΓΜΑΤΟΓΝΩΜΟΛΟΓΙΚΗ ΖΕΥΓΔΑΤΙΟΥ', '01503-AE10.01 - DIAGNOSTIC REPORT', 'C.016 - ΔΙΑΔΙΚΑΣΙΑ Α.Ε.', '01605 - Προσκληση ΟΜΕΓΑ', '01605-AE10.01 - DIAGNOSTIC REPORT', and '01613 - ΔΕΔΗΕ - NEW WAREHOUSE'. Below this is an 'Issue Communications' table with columns for 'I', 'RC', 'Date', and 'Description'.

TIME SCHEDULE MANAGEMENT

Time Schedule Management includes

- Determination of **Project Milestones**
- Determination of **Procurement Schedule**, especially for materials with long lead time (e.g. equipment such as industrial doors etc)

QA/QC Management includes **coordinating** all Sub-contractor submittals and specifying all managerial **procedures** between different works, so as to guarantee the **quality** of the Project, in terms of:

- Quality Assurance: Adherence to the Quality Management Plan
- Quality Control: Adherence to contract requirements and approved Method Statements and Inspection & Test Plans (ITPs)

Sub-contractor for
PEB Steel

Sub-contractor for
Sandwich Panels

Sub-contractor for

PROCUREMENT SCHEDULE

Model LD – 11.2 K-factor Large Drop Upright Control Mode Specific

General Description

The TYCO Model LD, 11.2 K-factor Large Drop Upright Sprinkler, Standard Response Control Mode Specific Application is a glass bulb type automatic sprinkler. It is intended for use with the National Fire Protection Association "large drop sprinkler" installation criteria for the protection of high piled storage. The LD Sprinkler can provide a higher level of protection than standard spray sprinklers and, in some cases, can provide an economic advantage by eliminating in-rack sprinklers.

NOTICE

The TYCO Model LD 11.2 K-factor, Large Drop Upright Sprinkler described herein must be installed and maintained in compliance with this document, as well as with the applicable standards of the National Fire Protection Association, in addition to the standards of any other authorities having jurisdiction. Failure to do so may impair the performance of these devices.

The owner is responsible for maintaining their fire protection system and devices in proper operating condition. Contact the installing contractor or manufacturer with any questions.

IMPORTANT

Always refer to Technical Data Sheet TFP700 for the "INSTALLER WARNING" that provides cautions with respect to handling and installation of sprinkler systems and components. Improper handling and installation can permanently damage a sprinkler system or its components and cause the sprinkler to fail to operate in a fire situation or cause it to operate prematurely.

GRUNDFOS

Description	Value
Product name:	Hydro I
Product No.:	950063
EAN number:	670063
Price:	On req.

Technical:	
Actual calculated flow:	22 m³/h
Min flow system:	2.4 m³/h
Max flow:	70 m³/h
Max flow system:	35 m³/h
Resulting head of the pump:	111 m
Head max:	126 m
Impellers main:	6
Main pump name:	CR120-I
Main pump No.:	965044
Number of pumps:	2
Non-ret. valve:	at disch

Installation:	
Maximum operating pressure:	16 bar
Maximum inlet pressure:	3.4 bar
Flange standard:	DIN
Manifold inlet:	DN 80
Manifold outlet:	DN 80
Pressure stage:	PN 10/1

Liquid:	
Pumped liquid:	Water
Liquid temperature range:	5 - 80 °C
Liquid temp.:	20 °C
Density:	998.2 kg
Kinematic viscosity:	1 mm²/s
